

International Community of Women Living with HIV Eastern Africa

Day 10/16 Days of Activism on ending Violence Against Women

Disability and Violence

There is a close relationship between disability and Violence. Women and girls living with disabilities experience different forms of violence ranging from structural, institutional physical, sexual and gender-related and yet their experience of this violence often remains hidden and unaddressed due to the multiple barriers they face.

Violence against Women living with Disability has no place in the world in this 21st Century.

Call to Action on Governments

Declare an end to all forms of violence against women living with disability, identify and commit to instituting mechanisms to address Violence around a clear and coherent agenda, ensuring social cultural systems, laws and policies are preventing violence and influencing violence free systems and communities.

Call to action on Women

Amplify your Voice, Orange the World, demand for elimination of violence against women in all forms. Join us at #WLHIVSPEAKOUT; Join the Global Campaign (Orange the World, #HearMeToo)
